

Insulated FRP Rescue Rod (RESQ)

Voltech RESQ

Product specifications:

The Insulated FRP Road is a significant piece of equipment for any workplace that is used to remove an injured worker from a dangerous situation. This instrument is essential in confined locations, vaults, and even merely close to electrical panels and switchgear. The handle is fibreglass reinforced for enhanced electrical insulation, and the body hook is coated and heat treated. The stick is available in the usual 6 foot lengths.

Technical Specification:

- Material: FRP
- Process: Automatic Pultrusion Plant
- HV Test: 220 kV
- Total Section: 1 Section
- Assembled Length: 6 feet length
- Insulated Grip: Middle and Bottom
- Dia: 40 mm
- Top Hook: 450 mm PU Insulated
